

PSF SYNTH

Product Description:

PSF SYNTH is a fully synthetic power steering fluid dedicated for most common passenger cars and light-duty commercial vehicles.

PSF SYNTH is formulated from specially selected high quality fully synthetic Poly-alpha olefin (PAO) base stocks in combination with a special detergent additive to achieve the following performance:

- Excellent cleaning properties
- Improves performance and smoothness of operation in power steering systems
- High Viscosity Index
- Miscible with all common power steering fluids.
- Very bright and light colored oil helps improves visual detection when flushing is completed; reducing total volume of used flushing oil

PSF SYNTH is recommended where the following OEM specifications / part numbers are required:
